ALISTOCARE

Health Center Queue Companion

PROPOSAL SUMMARY

1. Establish Problem

Long queues and uncertainty about when patients will be served.

2. Introduce the Solution

A digital queue system with estimated waiting times and status updates.

3. Benefits

More convenient waiting and better queue management.

4. What Makes Us Different

Combines queue tracking and patient notifications for community health centers.

1. ESTABLISH THE PROBLEM

Time Challenge: Uncertain waiting times

- Patients may spend considerable time waiting for consultations.
- Queue positions and estimated waiting times may not be readily available.
- Waiting can be especially inconvenient for senior citizens and parents with children.

“Long waiting time is perceived by patients as a barrier to health services.” – Barbadillo et al. (2024)

2. INTRODUCE THE SOLUTION

Meet **AlistoCare**

A proposed digital queue management system that connects patients and health center staff through:

- Digital queue numbers
- Estimated waiting times
- Turn notifications
- Staff dashboard

3. STATE THE BENEFITS

A better informed waiting experience:

For **Patients**

- Better visit planning
- Less uncertainty while waiting
- Convenient access to queue updates

For **Health Center Staff**

- More organized queue monitoring
- Fewer repetitive queue inquiries
- Easier communication

4. WHAT MAKES ALISTOCARE DIFFERENT?

More than a queue number

Traditional Approach	Proposed AlistoCare
Paper ticket or verbal call	Digital queue number
Limited queue visibility	Status updates
Patients ask about their turn	Turn notifications
Manual queue monitoring	Staff dashboard

HOW ALISTOCARE WORKS

EXPECTED IMPACT AND CONSIDERATIONS

Designed for practical community healthcare

- Improve access to queue information.
- Help patients plan around estimated waiting times.
- Support staff in organizing patient flow.
- Preserve existing consultation and emergency triage procedures.

ALISTOCARE: LESS GUESSING, BETTER WAITING.

AlistoCare aims to make healthcare visits more organized by keeping patients informed and helping health center staff manage queues efficiently. Because waiting for care should not mean waiting without information.
