AlistoCare

Patient Flow & Wait Time Analytics

BUSANALY Final Project | Real Kaggle encounter dataset · 2023–2024 | 9,216 source encounters

Explore patient flow

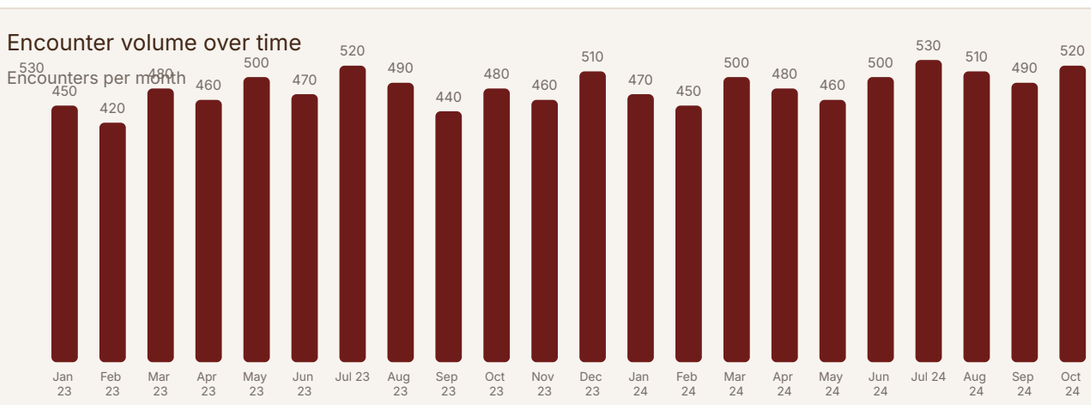

Use the filters to update every KPI and visualization.

From date | To date | Department: All departments | Day of week: All days | Admission status: All statuses | Reset filters

Patient encounters	Average wait	Median wait	Wait over 30 min	Admission rate	Avg satisfaction
9,216	35.3	35	59.3%	50.0%	4.99
Filtered records	Minutes per encounter	Minutes per encounter	Share of filtered encounters	Admission / all encounters	Available scores only

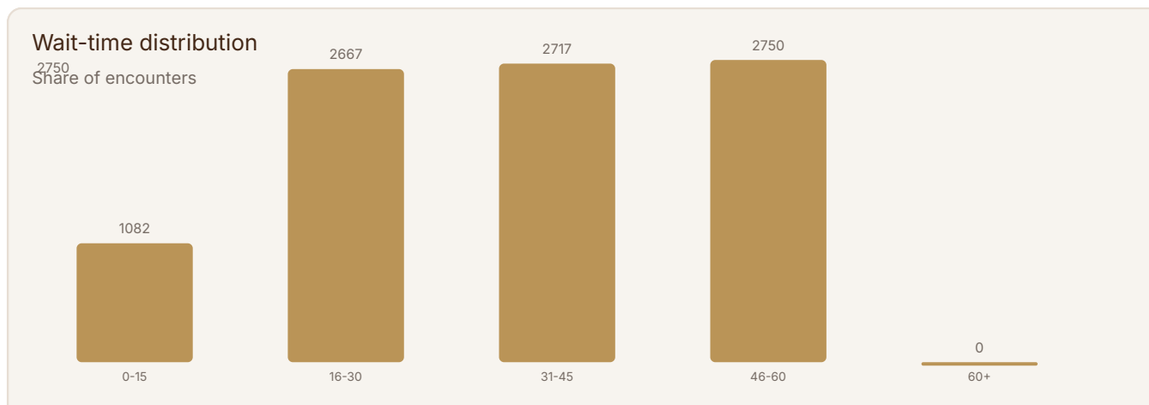

Encounter volume over time

Monthly encounter counts within the selected date range.

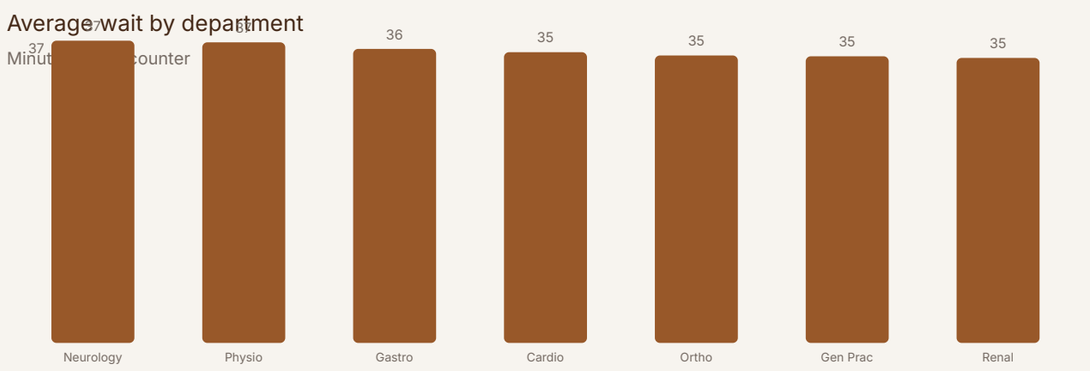

Wait-time distribution

Share of encounters in each wait-time band.

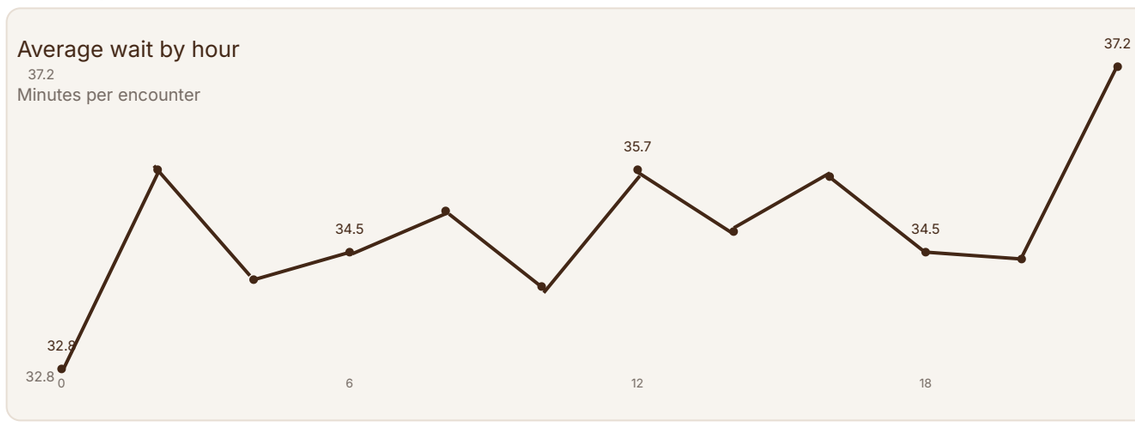

Average wait by department

Only encounters with a recorded department; missing department excluded.

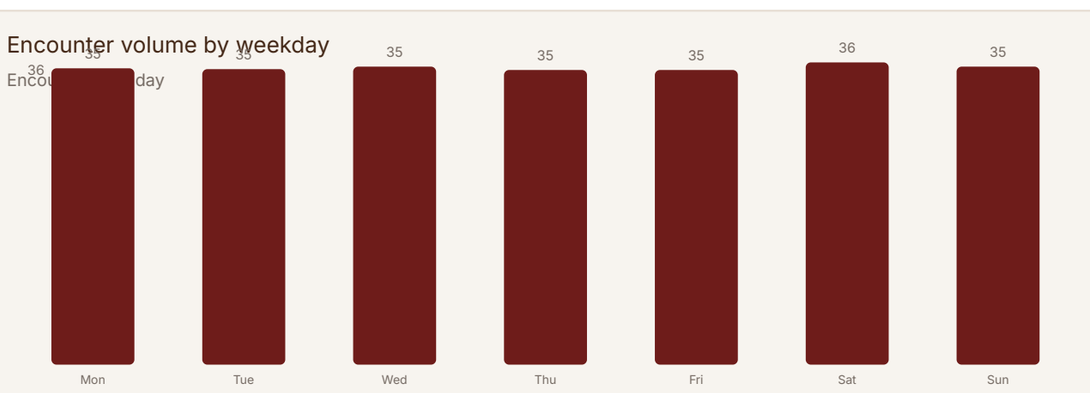

Average wait by hour

Hourly averages; interpret alongside encounter count.

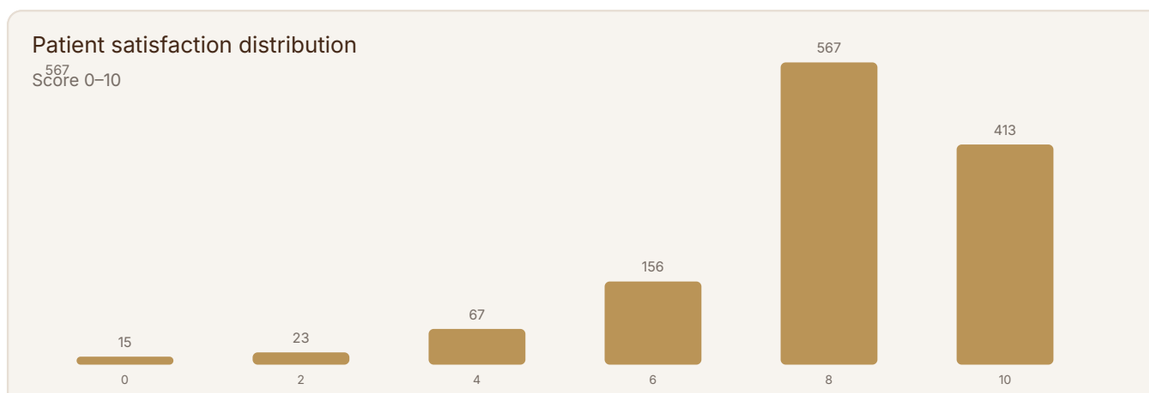

Encounter volume by weekday

Counts by day of week, ordered Monday to Sunday.

Patient satisfaction distribution

Available scores only. Most encounters have no score.

Data interpretation:
Satisfaction and department fields are incomplete. Their charts use available observations only. Missing department values are shown as "Unspecified" in the department filter.

Source: Healthcare Analytics Patient Flow Data, Hassan Jameel Ahmed, Kaggle, CC0 Public Domain.
Dashboard uses anonymized encounter-level fields only; patient identifiers and names are not embedded.
This dashboard describes observed patterns and does not establish causation or prove AlistoCare effectiveness.
Date parsing rule: first component greater than 12 → DD/MM/YYYY; otherwise MM/DD/YYYY convention retained.
